

LUIS VELASQUEZ

Full Stack Engineer

ABOUT ME

I am a Systems Engineer with over 4 years of experience in developing web applications and software solutions. I specialize in solving complex problems and designing innovative solutions that optimize processes and enhance business performance. I stand out for my teamwork skills, adaptability, and commitment to tackling major challenges that create a positive impact on organizations.

Own Vehicle: Yes

Driver's License: Yes

EDUCATION

Catholic University of Honduras

Computer Science Engineering
2017 - 2022

Secondary Education

Technical Professional Baccalaureate in IT
San Francisco Institute
2011-2016

CERTIFICATES

- CISCO CCNA I
- Photoshop - INFOP
- English (Basic, Intermediate, UpperIntermediate) - INFOP
- React, React Native, Angular, OpenAI, AWS - Udemy
- Tester and Technician in Computer Equipment Installation and Repair - Capacitate.org

LANGUAGES

- Spanish
- English (Intermediate)

EXPERIENCE

Full Stack Developer & Tech Consultant (Freelance)

| January 2023 - Present

- **Custom Software Development:** Architected and maintained scalable custom web applications and sites using modern stacks such as React and Astro.
- **CRM & Business Solutions:** Developed tailored CRM systems featuring Kanban-style lead management and dynamic workflow tracking.
- **Automation & AI Integration:** Built automated workflows using n8n and AI (OpenAI) to streamline business operations and enhance productivity.
- **Data Visualization:** Designed and implemented dynamic dashboards with real-time data synchronization for enhanced business intelligence.
- **Cloud Infrastructure (AWS):** Managed cloud environments focusing on security and scalability, including IAM roles/policies, S3 bucket management, EC2 instances, CloudFront distribution, Automated deployment pipelines using GitHub Actions (CI/CD) and managed email services (SES).
- **API & Systems Integration:** Developed seamless API integrations between landing pages and CRM platforms, including automated email notification systems.

Full Stack Developer

Cable Color | February 2022 - August 2026

- **Regional Development & Web Platforms:** Led the architecture, design, and continuous maintenance of official corporate websites across the region, ensuring high availability, optimized performance, and business continuity.
- **Enterprise Management Systems (ERP/CRM):** Designed and implemented custom enterprise software modules (Human Resources, Logistics/Dispatch, Corporate Business, Document Management DMS, Corporate Portal, Contracts, Ticketing/Requirements, Channel Lineups, and Custom CMS), streamlining key operational workflows.
- **Integrations & Web Services:** Developed and consumed RESTful APIs and web services focused on system interoperability, connecting internal modules with third-party platforms.
- **Security, Auditing & DAST Practices:** Conducted software audits validating UI consistency and integrity, robust authentication mechanisms (JWT/OAuth2 tokens), OSINT analysis for asset exposure assessment, and Dynamic Application Security Testing (DAST) to mitigate pre-deployment vulnerabilities.
- **Cloud Ecosystem (AWS):** Managed cloud infrastructure, deploying containerized monolithic architectures (Docker on EC2) configured with Nginx proxies and SSL certificates (Certbot). Automated deployment pipelines using GitHub Actions (CI/CD), secured environment variables with Parameter Store, and managed email services (SES), object storage (S3), and fine-grained access control (AWS IAM).
- **Data Engineering & Automation:** Developed automated data extraction and manipulation routines (ETL) to provide daily updates for critical tables and business intelligence reports.
- **Technical Governance:** Authored and maintained comprehensive technical documentation to ensure long-term system stability and scalability.

IT Support Assistant (Intern)

DIUNSA | August 2016 - November 2016

- Computer Maintenance.
- Formatting and Installing Operating Systems.
- Network Bridge Setup for the Warehouse Area.
- Printer Configuration for IP-based connection and printing from different areas

TECHNICAL SKILLS

- **Frontend Development:** JavaScript (ES6+), TypeScript, React, Next.js, Astro, Angular, React Native, Xamarin.
- **UI & Design:** HTML5, SASS, TailwindCSS, Adobe Creative Suite.
- **Backend & Infrastructure:** Node.js, PHP, C#, WordPress, Docker, Windows Server.
- **Databases:** PostgreSQL, MySQL, Oracle DB.
- **Cloud Services:** AWS (Basic), Oracle APEX.
- **Automation & AI:** RPA (UiPath), n8n (Automated Workflows & Chatbots), AI Integration (OpenAI API).
- **Data Tools:** Talend Studio (ETL/Data Extraction).
